1.0 Executive Summary

KLEINFELDER, INC. (KLEINFELDER) has performed a Phase I Environmental Site Assessment (ESA) of the property referenced as "Haul Road & Johnson Street" herein referred to as the "Site" or "Property." **KLEINFELDER** performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*⁽¹⁾.

1.1 Site Description

The Site is located south of the intersection of Haul Road and Johnson Street in Wilkes Barre Township, Luzerne County, Pennsylvania. The Site consists of three (3) parcels totaling 85-acres. The Site is comprised of vacant land consisting of wooded areas, vegetated land, a previously reclaimed anthracite coal mine, and railroad tracks. The Site is located within a primarily rural area. The tax parcel identification numbers associated to the properties are 69110-00A07F000, 69110-00A10A000, and 6919-00B03A000. Pagnotti Enterprises Incorporated is listed as the current owner of the properties.

1.2 Report Findings

The following is a summary of the findings and opinions of this report:

Current and Past Usage of the Site:

- Historically, the Site was used as an anthracite coal mine named Lehigh Valley Coal Company Franklin Colliery, dating back to as early as 1910. Mining operations continued at the Site until approximately 1981. Since that time, Kleinfelder did not note that development has occurred at the Site. The Site is classified as abandoned mine land (AML) with a status of reclamation completed. Many areas are now wooded or vegetated, and one strip pit has filled with water. Coal mining has been known to be associated with acid mine drainage (AMD). Typically, discharge through anthracite coal formations is generally neutral pH and often does not lead to AMD conditions. During Site reconnaissance, **KLEINFELDER** observed the conditions of a water feature on the Site; **no evidence of AMD** (i.e., yellowish to orange staining, cloudy water) was noted. **Therefore, it is the opinion of KLEINFELDER that the historic mining of the Site does not represent a Recognized Environmental Condition (REC).**
- During the Site reconnaissance, evidence of former railroad activity was observed within the northeastern and traversing the central portion of the Site. Remnants of the railroad tracks are evident through the Site based on the lack of vegetation, discarded railroad ties, metal rail lines protruding from the ground, and flat grade. According to historical Sanborn Fire Insurance Maps, eleven (11) railroad lines were located on the

property in 1910. Between 1910 and 1950, the tracks that exited the Site to the west were no longer depicted, and five (5) sets of tracks remained. Rail lines no longer appear to be visible in the 1981 historical aerial image. Railroad tracks and associated equipment and staging areas are often associated with potential contamination from leaking of lubricants, PCBs, metals, and various petroleum products. Given that portions of the Site have at one time contained eleven (11) sets of railroad tracks since 1910, with portions of the rail lines still currently at the Site, it is the opinion of **KLEINFELDER** that this finding **does** represent a REC.

- According to the 1910 Sanborn map, the Lehigh Valley Coal Company Franklin Colliery contains a fireman's office, engine house, a two-story oil house, a sawmill, a supply storage house, a pump house, a district support office, a courthouse, a pump house, several outbuildings, a breaker structure, rail lines, and a tool shop. The Site was listed as utilizing steam and electricity with fuel coal during operations. The 1969 Sanborn map identifies a grease house located southwest of the main office. **Based on known tool shop and historic operations at the Site that may have handled petroleum products, it is the opinion of KLEINFELDER that these findings do represent a REC.**
- While onsite, five (5) dumping areas were observed and designated by Kleinfelder as Dump-1 through Dump-5.
 - Dump-1 is located near the eastern property border of the Site and consists of construction debris primarily comprised of asphalt, concrete, and stone. Additionally, household trash consisting of plastic items and general garbage was in the area.
 - Dump-2 is located on the north-central portion of the Site and consists of empty 55-gallon storage drums, household waste, and construction debris. A burn barrel was located just south of Dump-2 and appeared to contain mainly wood.
 - Dump-3 is located just south of Dump-2 and contains tires, crushed empty 5-gallon bucks, construction signs, aluminum cans, tires, wooden boards, and rubber sheeting.
 - Dump-4 is located south of Dump-3 and within a heavily wooded area and consists of empty 5-gallon buckets, corrugated piping, household trash, tires, and metal scrap.
 - Dump-5 keeps consistent with the other dump areas and is located along Allan Road. No evidence of petroleum products, hazardous substances, or other indications of contamination (i.e., odors, signs of staining, stressed vegetation, etc.) were observed in association with any of these features. Given that the possibility exists that **hazardous substances or petroleum products may be present beneath the surface of the dumping**

areas, it is the opinion of **KLEINFELDER** that these findings **do** represent a **REC.**

- A paper target and bullet casings were observed on the ground on the eastern portion of the Site. Based on the likely presence of lead in underlying soils due to the use of this portion of the Site as a shooting range, it is the opinion of **KLEINFELDER** that this finding **does** represent a **REC.**
- Throughout the Site are small areas of tires, demolition and landscaping debris, household waste items, appliances, metal scraps, empty metal 55-gallon storage drums, rubber sheeting, and glass. Some of these areas appear to be consistent with the Site's prior use for staging materials. In addition, no staining or stressed vegetation was observed in these areas; therefore, **KLEINFELDER** believes that these findings **do not** represent a **REC.**
- The Site was listed on the eFACTS database under South Wilkes-Barre 656803 – Abandoned Mine Land (AML) Inventory List. According to the eMapPA database, the property is listed as an AML Inquiry under Pagnotti Enterprises Inc. for deep underground coal mining. The reclamation status is listed as complete. No other information is provided. Therefore, it is the opinion of **KLEINFELDER** that this finding **does not** represent a **REC.**

1.3 Conclusions

This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

- Railroad tracks that are historically and currently located on the Site.
- The likely presence of petroleum products or hazardous substances in Site soils associated with historic Site operations identified on the Sanborn Fire Insurance Maps.
- The five (5) areas of dumping on the Site.
- The likely presence of lead in Site soils associated with the shooting range.

1.4 Data Gap

KLEINFELDER performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. During the course of this assessment, one data gap was encountered while conducting this Phase I Environmental Site Assessment. ASTM E 1527-13 states the historical use of a property should be identified at five-year intervals dating back to original development or 1940, whichever is earlier. Data gaps exceeding five-year intervals were encountered during our

historical research of the Site. However, it is the opinion of **KLEINFELDER** that these data gaps are not significant with regard to identifying RECs.

1.5 Reliance and Declaration

KLEINFELDER performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. **KLEINFELDER** prepared this Phase I ESA for the exclusive benefit and use of Bluecup Ventures, LLC.

2.0 Introduction

KLEINFELDER INC. (KLEINFELDER) has performed a Phase I Environmental Site Assessment (ESA) of the property referenced as "Haul Road & Johnson Street" located south of the intersection of Haul Road and Johnson Street in Wilkes Barre Township, Luzerne County, Pennsylvania (herein referred to as the "Site" or "property"). **KLEINFELDER** prepared this Phase I ESA for the exclusive benefit and use of Bluecup Ventures, LLC. Sections 8.0 and 9.0 contain the findings and opinions, and conclusions, respectively, of this Phase I ESA.

KLEINFELDER performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*.

KLEINFELDER derived the findings presented within this Phase I ESA report from the following sources: records review of reasonably ascertainable and practically reviewable sources, site reconnaissance (a visit to the property), and interviews with knowledgeable parties. Any exceptions to (or deletions from) this practice are described in Sections 2.4, 2.5, 10.0 and 14.0 of this report.

2.1 Purpose

KLEINFELDER conducted this Phase I ESA at the request of Mr. Jeff Randolph of Bluecup Ventures, LLC in consideration for the development of the property. The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to this process, RECs in connection with the Site. ASTM International (ASTM) defines a REC and related terms as follows:

Recognized Environmental Condition (REC) is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to the release; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Historical REC (HREC) is "a past release of any hazardous substance or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."

Controlled REC (CREC) is "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the

issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

De minimis condition is "a condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions."

Business Environmental Risk (BER) is "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-cope considerations."

2.2 Detailed Scope of Services

KLEINFELDER performed this Phase I ESA to assess the potential for RECs at the Site and in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. The Phase I ESA included the following activities:

- Research and review of available background information (provided to us and from in-house database systems) regarding the Site in order to identify areas and/or items of potential concern relative to contamination or storage of hazardous waste. We coordinated a computer search of various pertinent databases (including Sanborn maps).
- Contacting state and local agencies regarding the availability of files for the subject site and adjoining properties.
- A site visit to perform a visual reconnaissance to identify evidence of RECs. The reconnaissance included readily visible and accessible areas of the site only. The site reconnaissance also included observing the current uses of adjoining properties to the extent practicable without entering the adjoining properties.
- Review of selected historical aerial photographs and other historical sources.

The findings and conclusions discussed in this report are based on the historic data readily available to our project team and the specific conditions observed (and documented) during our site inspection. No attempt has been made to comment on conditions beyond those documented in our Phase I ESA report and certification of the property is not made or implied in this regard.

KLEINFELDER relied upon the documents and information provided; we assume no responsibility or liability for their accuracy or completeness. Further, it is possible that due to site-specific limitations certain RECs might not have been visible. **KLEINFELDER** provides no guarantee that this Phase I ESA identified all RECs associated with the Site.

Special Note Regarding Procedural Changes for “All Appropriate Inquiry”

The Small Business Liability Relief and Brownfields Revitalization Act of 2002 mandated that the United States Environmental Protection Agency (USEPA) develop a rule to establish procedures that a person claiming liability relief as an “innocent purchaser,” a “bona fide prospective purchaser” or a “contiguous landowner” must follow. The 2002 legislation identified the assessment mechanism as the ASTM International E 1527-00 “Standard for Environmental Site Assessments: Phase I Environmental Site Assessment Process.” USEPA developed the All Appropriate Inquiry Rule (the Rule), which was published in the November 1, 2005, Federal Register with an effective date of November 1, 2006. The Rule also identifies the ASTM Standard as the assessment mechanism to demonstrate “All Appropriate Inquiry.” ASTM worked closely with the USEPA so that a revised Standard (E 1527-13) was prepared to mirror and implement the new rule. **KLEINFELDER** performed this Phase I ESA in accordance with E 1527-13.

2.3 Significant Assumptions

KLEINFELDER assumes that all information provided to us either by the Client, the Client’s representatives, persons identified as being knowledgeable about the Site history and/or operations, the environmental database search subcontractor, regulatory agencies or other involved parties was truthful, complete, accurate and provided in good faith. **KLEINFELDER** relied upon the documents and information provided; we assume no responsibility or liability for their accuracy or completeness.

2.4 Limitations and Exceptions

KLEINFELDER performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*. The RECs identified in this Phase I ESA report are limited to those **KLEINFELDER** identified in the records reviews, site reconnaissance, and interviews that are documented within. This Phase I ESA did not include an inspection of subsurface conditions, or any subsurface testing or sampling (e.g., air, water, soil, and building materials).

2.5 Special Terms and Conditions

No special terms or conditions were part of this assessment.

2.6 User Reliance

All reports, plans, specifications, electronic data, field data, notes and other documents (“Work Product”) prepared by **KLEINFELDER** pursuant to this Agreement are intended for the exclusive use and reliance by the Client. Any other use or reliance by others without the written approval of **KLEINFELDER** will be at the Client's sole risk and without liability or legal exposure to **KLEINFELDER**. The Client shall indemnify, defend, and hold harmless **KLEINFELDER** from and against any claims, damages or losses including reasonable attorney's fees and costs, arising out of, or resulting from such unauthorized use or reliance.

KLEINFELDER assumes that the Client intends to use this Phase I ESA for the purposes of qualifying for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act (SBLRBRA) and the regulations set forth at 40 CFR 312, and the Client can rely upon this Phase I ESA for this purpose.

3.0 Site Description

3.1 Location and Legal Description

The Site is located south of the intersection of Haul Road and Johnson Street in Wilkes Barre Township, Luzerne County, Pennsylvania. The Site consists of three (3) parcels totaling 85-acres. The tax parcel identification numbers associated to the properties are 69110-00A07F000, 69110-00A10A000, and 6919-00B03A000. Figure 1 displays the approximate location of the Site on a portion of the USGS 7.5-minute Wilkes Barre, PA Quadrangle Map⁽²⁾. Figure 2 displays the tax parcel boundary of the Site according to the Luzerne County tax assessment websites⁽³⁾. Figure 3 depicts the Site on an aerial image and shows the locations of key findings and RECs. The properties are currently owned by Pagnotti Enterprises Inc.

3.2 Site and Vicinity Characteristics

The Site is comprised of vacant land consisting of wooded areas, vegetated land, a previously reclaimed anthracite coal mine, a portion of Allan Road, and railroad tracks. Haul Road and Johnson Street intersection, commercial properties, wooded areas, and residential properties are located north of the property. Allan Industries (scrap metal yard), wooded areas, and abandoned coal mines are located to the south of the Site. Wooded areas and abandoned coal mines are located to the east of the Site. Vegetated areas and Interstate 81 are located to the west of the Site. The Site is located within a primarily rural area, with sprawling commercial and residential development further beyond the Site's north and west limits.

3.3 Current Use of the Site

The Site is currently vacant.

3.4 Descriptions of Site Features

3.4.1 Structures

No aboveground structures are currently located on the property.

3.4.2 Roads

The property is accessed off Allan Road to the west and Haul Road to the north. Gravel access roads traverse most of the Site.

3.4.3 Heating/Cooling Systems

The Site does not contain any active heating or cooling systems.

3.4.4 Sewage Disposal

No sewer systems were noted on the Site.

3.4.5 Potable Water

The Site does not contain a known source of potable water.

3.4.6 Other Site Improvements

Abandoned railroad tracks were observed to traverse the Site.

3.4.7 Surface Water

No stormwater systems were observed at the Site.

3.5 Current Uses of Adjoining Properties

North – The intersection of Haul Road and Johnson Street, commercial and light industrial properties, wooded areas, and residential properties.

South – Allan Industries, wooded areas, and abandoned coal mines.

East – Wooded areas and abandoned coal mines.

West – Vegetated areas and Interstate 81.

4.0 User Provided Information

KLEINFELDER submitted an “All Appropriate Inquiry” User Questionnaire to the User of this Phase I ESA to describe their relative to the information discussed in the following subsections. However, at the time of writing this report, **KLEINFELDER** was not provided the User Questionnaire.

5.0 Records Review

5.1 Standard Environmental Record Sources

The ASTM Phase I ESA process includes the review of select Federal and State environmental record sources in order to evaluate the potential existence of RECs either on the Site or within specified distances from the property. ASTM has established search radii for each of these standard environmental record sources. **KLEINFELDER** performed this records review utilizing a computer database search report (Appendix A) prepared by Environmental Data Resources, Inc. (EDR)⁽⁴⁾. The outlined area on the Topographic Map, Overview Map and Detail Map of the database report marks the approximate location of the Site. This report keys the surrounding sites on the ASTM-specified databases to the inclusive Overview Map and Detail Map. **KLEINFELDER** notes that some of the sites may be listed in more than one (1) database. Furthermore, EDR may have been unable to plot certain sites due to incomplete information, resulting in a list of “unplottable” or “orphan” sites.

Table 1 presented below summarizes the database listings from the EDR Report. Only those databases which have facilities within the specified search distances are provided within this table. For a full list of the databases searched, please refer to the EDR Report within Appendix A.

Database	Target property	Search Distance (miles)	<1/8 mile	1/8 – 1/4 mile	1/4 – 1/2 mile	1/2 - 1 mile	Total Plotted
SEMS-ARCHIVE	-	0.50	1	0	0	-	1
RCRA-SQG	-	0.25	0	1	-	-	1
RCRA-VSQQ	-	0.25	0	3	-	-	3
LUST	-	0.50	3	3	1	-	7

PA MINES	-	0.25	0	1	-	-	1
TOTAL	0	-	12	22	2	0	36

“-” Indicates no database search for this search distance

“TP” Target Property

The Site address was not identified within the EDR database search report. Additionally, the EDR report identified a total of thirty-six (36) database listings associated with twenty-two (22) facilities within the ASTM defined search radius of the Site. The identified facilities that were located within 1/8 mile are detailed below. Refer to the EDR report within the Appendices for additional information.

- **Uni-Mart 4302** – Route 309 & Interstate 81. This facility is listed approximately 135 feet north northwest of the Site at a lower elevation; however, Kleinfelder determined that this facility is located approximately 300 feet from the Site. This facility was listed on the PA leaking underground storage tank (LUST) and ARCHIVE Underground Storage Tank (UST) database with a site ID of 600526. The LUST database lists a release of unleaded gasoline during a tank closure event on September 22, 2005. The database states that soil contamination was noted at the fuel islands. As of May 28, 2008, the unleaded gasoline release is listed as Cleanup Completed. A release of diesel fuel occurred at the site on/or before August 5, 1989. The soil contamination was documented during a tank closure event. As of July 24, 2007, this release is listed as Cleanup Completed. The ARCHIVE UST database lists ten (10) USTs were listed onsite; seven (7) USTs (six 10,000 and one 5,000- gallons) containing GAS (gasoline) and three USTs(3) (12,000, 5000, and 4000-gallons) containing diesel fuel. All USTs are listed as removed. Based on the distance from the Site, apparent downgradient location from the Site, and case closure status, this facility is not considered a REC likely to have affected soil, soil vapor, or groundwater beneath the Site.
- **Latona Mining, LLC** – No address provided. The facility is located approximately 140 feet west-northwest of the Site at a lower elevation and is listed on the US MINES database. This facility is identified under Mine ID: 3601673. The status is listed as temporarily closed. No other information was listed within the EDR report. This listing information alone does not suggest evidence of a REC to the Site.
- **Northeast Energy Company** – No address provided. The facility is located approximately 440 feet northwest of the Site at a lower elevation and is listed on the US MINES database. This facility is identified under Mine ID: 3608325. The status is listed as permanently closed. No other information was listed within the EDR report. This listing information alone does not suggest evidence of a REC to the Site.
- **Georgetown Stripping** – No address provided. The facility is located approximately 500 feet northwest of the Site at a lower elevation and is listed on the ABANDONED MINES database. This facility was listed under Mine ID 3608325

(identical to Northeast Energy Company). The status of the mine is listed as abandoned. No other information was listed within the EDR report. This listing information alone does not suggest evidence of a REC to the Site.

- **Ashley Borough Dump** – Franklin Jct on West Liberty Street. The facility is listed approximately 517 feet northeast of the Site; however, Kleinfelder determined this facility is located approximately 4,000 feet west of the Site. The property was identified on the Superfund Enterprise Management System (SEMS) ARCHIVE databases. This facility is identified under ID 0302329. The National Priorities List (NPL) status states that the facility does not qualify for the NPL based on existing information. No further information is listed. Based on the status and distance from the Site, this facility is not considered a REC likely to have affected soil, soil vapor, or groundwater beneath the Site.
- **Cleveland Bros Equipment** – 970 Wilkes Barre Township Blvd. This facility is located approximately 580 feet north of the Site at a lower elevation. This facility was listed on the ARCHIVE UST database with a site ID of 237247. The facility is listed as having one (1) 2,000-gallon gasoline UST and one (1) 2,000-gallon diesel UST both closed without a permit. Additionally, the facility is listed on the LUST, PA ARCHIVE AST, and RCRA NonGen/NLR databases. The LUST database lists a release of confirmed on August 20, 1991. As of April 16, 1992, the site is listed as Cleanup Completed. The ARCHIVE AST database lists two (2) ASTs (2,000 and 1,000 gallons) containing diesel fuel. All ASTs are listed as removed. Based on the distance from the Site, apparent downgradient location from the Site, and case closure status, this facility is not considered a REC likely to have affected soil, soil vapor, or groundwater beneath the Site.
- **First Eastern Bank** – 1000 Wilkes Barre Township Blvd. This facility is located approximately 604 feet north northwest of the Site at a lower elevation and is listed on the LUST database. The LUST database lists a release of confirmed on May 17, 1994. Soil contamination was documented during a tank closure event of unleaded gasoline. As of March 1, 2013, the facility is listed as Cleanup Completed. Additionally, the facility is listed on the PA ARCHIVE UST database for a 10,000-gallon gasoline UST that was closed without a permit. No violations were listed for this database. Based on the distance from the Site, apparent downgradient location from the Site, and case closure status, this facility is not considered a REC likely to have affected soil, soil vapor, or groundwater beneath the Site.

In addition, EDR identified three (3) “unplottable” or “orphan” facility listed in the database report. These unmapped sites have incomplete information regarding their locations and could not be accurately plotted in relation to the target property. The orphan summary/unmapped site report was reviewed to assess the potential for the listed facility to pose a REC to the Site. Based on the review, the facilities listed are not considered RECs likely to have affected soil, soil vapor or groundwater beneath the Site.

5.2 Additional Environmental Record Sources

5.2.1 Records Request

Pursuant to the Freedom of Information Act (FOIA), **KLEINFELDER** submitted information requests (copies can be found in Appendix B) for the Site to the following agencies:

- The United States Environmental Protection Agency (USEPA)⁽⁵⁾
- Pennsylvania Department of Environmental Protection (PADEP) Office of the Records Custodian
- Luzerne County Open Records Officer
- Wilkes Barre Township Open Records

KLEINFELDER submitted an electronic request to the USEPA on April 15, 2021. **KLEINFELDER** performed a multisystem query of EnviroFacts, USEPA’s electronic database system. The Site was not identified on the EPA website.

The Pennsylvania Department of Environmental Protection (PADEP) was contacted on April 6, 2021, for a review of files about the Site. PADEP responded on April 14, 2021, indicating they do not have any files associated with the property. A second request to PADEP Reclaimed Mines Bureau (Kim Snyder, P.E. – 570-826-2371) was completed via telephone on May 7, 2021. No responses have been received from the PADEP Bureau of Abandoned Mines.

KLEINFELDER submitted a records request to the Luzerne County Open Records Officer on April 6, 2021. On April 10, 2021, Shannon Crake Lapsansky, Esq., Open Records Officer with the Luzerne County, informed **Kleinfelder** via email that Luzerne County does not have environmental records pertaining to the Site.

KLEINFELDER submitted a records request to Wilkes Barre Township on April 6, 2021. On April 8, 2021, Thomas Zedolik with Wilkes Barre Township responded, stating that there are no files pertaining to the Site.

5.2.2 Database Search

In order to obtain further information regarding the Site and adjacent properties, information was reviewed on the following databases maintained by the PADEP:

- Environment Facility Compliance Tracking System (eFACTS)⁽⁶⁾
- eMapPA⁽⁷⁾
- Storage Tanks Application Database⁽⁸⁾
- NPMS Public Viewer⁽⁹⁾

The Site was listed on the eFACTS database under South Wilkes-Barre 656803 – Abandoned Mine Land (AML) Inventory List. According to the eMapPA database, the property is listed as an AML Inquiry under Pagnotti Enterprises Inc. for deep underground mining of coal. The reclamation status is listed as complete. The Site was not identified on the Storage Tanks Applications database or NPMS Public Viewer website.

5.2.3 Additional Sources

At the time of writing this Phase I ESA, no additional sources were reviewed.

5.3 Physical Setting Source(s)

5.3.1 Topography

The USGS provides topographic map coverage for this property in the Conyngham and Wilkes Barre, Pennsylvania, 7.5-Minute Quadrangle. According to the topographic map, the Site is located at an elevation range between approximately 700 to 800 feet above mean sea level. The surface topography on the slopes toward the south-southwest. The property has been disturbed over its history leaving the existing ground surface and topography highly variable. The topographic map showed Laurel Run to the south of the Site. Groundwater flow direction is anticipated to flow in a south-southwestern direction, generally following topographic slope; however, the direction of groundwater flow beneath the Site can only be accurately determined through a groundwater investigation.

5.3.2 Geology

According to the Pennsylvania Geologic Survey's Atlas of Preliminary Geologic Quadrangles, Fourth Series, 1981⁽¹⁰⁾, the Site is situated in the Pennsylvanian Llewellyn Formation (geologic symbol Pl).

The Pennsylvania Geologic Survey publication, *The Engineering Characteristics of the Rocks of Pennsylvania*, Second Edition, 1982⁽¹¹⁾, describes the rock in this formation as consisting of interbedded layers of sandstone, siltstone and

conglomerate; which range from medium- to coarse-grained; light gray to brown, with numerous anthracite coal and dark-gray to black shales. The sandstone in this formation is well bedded and thick to massive, while the coal and shale beds are relatively thin. Fractures are moderately developed and moderately distributed. Joints are moderately spaced, open, and steeply dipping. The rock is slightly to moderately weathered to a shallow or moderate depth, dependent on the local lithology. The resulting soil mantle is thin to moderately thick. This formation is difficult to excavate with a fast or slow drilling rate, again dependent on the specific rock type encountered.

5.3.3 Soils

According to soil data obtained from the NRCS Web Soil Survey⁽¹²⁾, the soils within the Site consist primarily of Strip mine (Sm). According to the USDA Soil Conservation Service, the parent material of the parent material of strip mine soils is also coal extraction mine spoil. The profile is listed as very channery sandy loam to 6 inches and very channery silt loam to at least 60 inches. This soil has very low available water storage. This soil type is not listed as hydric.

5.4 Historical Use Information on the Property

ASTM E 1527-13 provides eight (8) standard sources from which the history of the Site/area may be established. These sources include the following:

1. Aerial Photographs
2. Fire Insurance Maps
3. Property Tax Files
4. Recorded Land Title Records
5. USGS Topographic Maps
6. Local Street Directories
7. Building/Engineering Department Records
8. Zoning/Land Use Records

The following subsections document **KLEINFELDER's** research of these Standard Historical Sources.

5.4.1 Aerial Photographs

Aerial photographs of the Site were obtained from EDR⁽¹³⁾. Copies of historical aerial photographs are provided in Appendix C. Brief land-use observations are summarized below.

- 1939 - The Site appears to have surficial disturbances associated to mining operation and wooded land. Roadways/railroad tracks have been aligned in the central and eastern portion of the Site. A railroad appears to bound the property to the southeast. The Site appears to contain three (3) large structures (office, breaker, and conveyor buildings) and several outbuildings concentrated on the northwestern portion of the Site. The eastern half of the property appears to be primarily mined. Surrounding areas consist of structures, railroad tracks, wooded land, and roadways.
- 1959 - The mining operation expanded in the southwest region of the Site and continuing beyond the Site to the west.
- 1966 - No significant changes have occurred to the Site.
- 1969 - It appears that mining activities continue at the Site, and strip pits appear to be more prominent. The western portion of the Site appears to be utilized for the storage of materials. A highway appears to have been constructed to the west of the Site.
- 1976 - No significant changes have occurred on or around the Site.
- 1981 - The mining operation no longer appears to be active with tree and vegetation observed throughout the property and the topography appears to be unchanged after this date. The rail lines no longer observed on the property. The northern portion of the Site appears to be utilized for the storage of materials.
- 1987 - No significant changes have occurred on or around the Site.
- 1992 - The western portion of the Site appears to be heavily utilized for storage. The remaining areas appear to be mainly clear and free of vegetation.
- 1999 - The Site appears to have been mainly cleared of all buildings and stored materials. The Site appears to be coming vegetated and contains five (5) trailers. No other significant changes have occurred on or around the Site.

2005 - Vegetation appears to be growing throughout the property, and the Site appears vacant.

2010 - Vegetation appears to be growing throughout the property.

2013 - No significant changes have occurred on or around the Site.

2017 - No significant changes have occurred on or around the Site. The Site appears to be similar to that observed during Site reconnaissance.

5.4.2 Fire Insurance Maps

Sanborn Fire Insurance Maps of the Site were obtained from EDR⁽¹⁴⁾. Copies of the Sanborn Maps have been included in Appendix D. Brief observations are summarized below.

1910 – The Site is labeled as Lehigh Valley Coal Company Franklin Colliery. The Site contains a fireman's office, engine house, a two-story oil house, a sawmill, a supply storage house, a pump house, a district support office, a courthouse, a pump house, several outbuildings, and a large breaking structure with associated rail lines. The Site appears to contain a mixture of eleven railroad lines and spurs. A conveyor structure appears to be powered by a boiler system that contains eleven (11) iron chimneys that are 56-feet tall.

1950 – The Site appears to have changed slightly from the 1910 Sanborn map. The Site is listed as utilizing steam and electricity with fuel coal. It appears that structures from the west on the 1910 Sanborn may have been plotted incorrectly. The property shows an office/tool shop, a time office, a switch house, a storage structure, two (2) engine houses, several outbuildings, and a breaker structure with associated structures with rail lines. A cave-in is identified southwest of the breaker structure. A city water line appears parallel to the rail line system through the Site. Approximately five (5) sets of railroad lines are located on the central portion of the Site.

1969 - The Site coverage on the 1969 Sanborn map appears to cover additional structures associated with the conveyor and rail lines. The breaker structure no longer appears on the Site. A boiler house appears with a compressor house. The structures located in the area of the rail lines and the boiler house are a screening structure, three (3) engine houses, a pump

house, and a vacant structure. A grease house is located southwest of the main office structure.

1975 - No significant changes are identified from the 1969 Sanborn Map.

5.4.3 Property Tax Files

KLEINFELDER reviewed the available tax information for the Site via Luzerne County tax assessment website. The Site consists of three (3) parcels totaling 85-acres. The tax parcel identification numbers for the property are 69110-00A07F000, 69110-00A10A000, and 6919-00B03A000.

5.4.4 Recorded Land Title Records

According to the Luzerne County tax assessment website, the parcels included in this ESA are currently owned by Pagnotti Enterprises Inc.

5.4.5 USGS 7.5 Minute Topographic Map(s)

KLEINFELDER did not obtain Historic Topographic Maps for the Site since it is unlikely that such a report would provide additional information for the Site.

5.4.6 Local Street Directories/MacRae's Industrial Directories

KLEINFELDER did not obtain a Local Street Directory or Industrial Directory Report.

5.4.7 Building/Engineering Department Records

No building and engineering department records were available to be reviewed for the Site. Further details are described in Section 5.2.1 – Records Request.

5.4.8 Zoning/Land Use Records

Land use for the Site parcel is designated as Commercial Acreage.

5.5 Historical Use Information on the Adjoining Properties

Based on information gathered from the historical resources, the land use surrounding the Site consisted primarily of mined areas with wooded/vegetated areas. Commercial and residential development has occurred over time.

5.6 Vapor Migration

The environmental records review was also completed to identify potential off-site sources for vapor migration of hazardous substances or petroleum products into the subsurface strata of the Site. Upon reviewing the applicable records, topography, hydrogeological information, and potential hydraulic barriers, no properties were identified in connection with potential vapor migration onto the Site.

6.0 Site Reconnaissance

KLEINFELDER conducted the Site reconnaissance for this ESA on April 5, 2021, for the Site review. The following subsections provide a summary of the on-site conditions that are pertinent to this ESA. Site reconnaissance photographs are included in the Appendix E of this report.

6.1 Methodology and Limiting Conditions

The Site investigation consisted of a visual inspection of the property to determine if any RECs exist on the Site. These independent conclusions represent **KLEINFELDER's** best professional judgment based on information and data available during the course of the project. No limiting factors were encountered during the Site investigation or visual inspection of the Site. **KLEINFELDER** was not accompanied during the Site reconnaissance.

6.2 General Site Setting

The Site is comprised of vacant land consisting of wooded areas, vegetated land, a previously reclaimed anthracite coal mine, a portion of Allan Road, and railroad tracks. Haul Road and Johnson Street intersection, commercial properties, wooded areas, and residential properties are located north of the property. Allan Industries (scrap metal yard), wooded areas, and abandoned coal mines are located to the south of the Site. Wooded areas and abandoned coal mines are located to the east of the Site. Vegetated areas and Interstate 81 are located to the west of the Site. The Site is located within a primarily rural area.

6.3 Site Observations

The Site is located south of the intersection of Haul Road and Johnson Street in Wilkes Barre Township, Luzerne County, Pennsylvania. The Site consists of three (3) parcels totaling 85-acres. The Site investigation was conducted on April 5, 2021. The following summarizes the onsite observations.

Item	Identified on-site	Comments
Hazardous Substances / Petroleum Products	No	
Aboveground Storage Tanks (ASTs)	Yes	One (1) empty 500-gallon AST is located on the northeast corner of the property.
Underground Storage Tanks (USTs)	No	
Storage Drums	Yes	Several empty metal 55-gallon storage drums are scattered across the Site. One 55-gallon drum appeared to be utilized as a burn barrel.

Unidentified Containers	Yes	Several empty unidentified 55-gallon drums and 5-gallon buckets are scattered across the Site.
Suspect Equipment Containing PCBs	No	
Interior Staining or Corrosion	No	
Drains or Sumps	No	
Wastewater	No	
Pits, Ponds, or Lagoons	Yes	Potential wetland areas were located on the central portion of the Site.
Pools of Liquid	No	
Solid Waste Dumping, Landfills, Fill Material	Yes	Piles of coal and rock found throughout the property; Five (5) areas of illegal dumping containing primarily tires, wood, demolition and landscaping debris, metal cables, large pieces of metal equipment, household waste items, plastic, and glass; Excessive amounts of junk (i.e., trash, metal scraps, tires, empty drums). Discarded concrete piping found on the central portion of the Site.
Stained Soil or Pavement	No	
Stressed Vegetation	No	
Septic Systems	No	
Wells	No	
Odors	No	
Other Conditions of Concern	Yes	Evidence of unearthed and buried railroad lines traverse the central portion of the subject property. In addition, a paper target associated with target shooting was located on the northern portion of the Site.

6.3.1 Exterior Observations

The Site encompasses a total of 85-acres and consists primarily of historically mined areas. The property is bound to the northwest by Interstate 81 and by Haul Road to the North. From the intersection of Haul Road and Johnson Road is a heavily vegetated area that consists of a swale and what appears to be a railroad bed. Continuing through the vegetated areas are the remnants of a wooden shed, a yellow metal cap, and an unidentified 2-inch PVC pipe protruding from the ground. An open, lightly vegetated area is located immediately south of Haul Road and contains construction equipment and automobiles. A stormwater line appears to discharge onto the Site from the north. Additionally, blue waterline markers were located throughout

the Site and traversed the central portion of the Site. No staining or stressed vegetated was noted in these areas.

Remnants of the railroad tracks are evident through the northern and central portions of the Site based on the lack of vegetation, discarded railroad ties, metal rail lines protruding from the ground, and flat grade.

An area of dumping (Dump-1) was identified on the northeastern portion of the Site. The dumping appeared to be down an embankment and consisted of construction debris primarily comprised of asphalt, concrete, and stone. Additionally, household trash consisting of plastic items and general garbage was in the area.

Continuing east along Haul Road, down an embankment, is an empty 500-gallon AST, metal cables with reels, and large pieces of solid metal equipment. No petroleum odors or evidence of a release was noted in this area. Just south of this area, a paper target was noted on a hillside attached to a tree. It appears this area was used for target practice.

Most of the central portion of the Site is cleared and consists of previously mined areas. A utility pole located within a fenced area was identified on the north-central portion of the Site. It is assumed that this area previously contained pole-mounted transformers. At the time of assessment, no pole-mounted transformers or evidence of stress vegetation was noted within the fenced area. However, continuing west from the cleared central portion of the Site is an area of dumping (Dump-2) within a wooded area. The dumping appears to consist of empty 55-gallon storage drums, household waste, and construction debris.

Dump-3 is located just south of Dump-2 in an open clearing. The area consists of tires, crushed empty 5-gallon buckets, construction signs, aluminum cans, tires, wooden boards, and rubber sheeting (identical to the reels of rubber sheeting located sporadically on the Site). South of Dump-3 is Dump-4, located within a heavily vegetated area. Dump-4 is an approximate 25'x25' area comprised of empty 5-gallon buckets, corrugated piping, household trash, tires, and metal scrap. The final area of dumping, Dump-5, keeps consistent with the other dump areas and is located along Allan Road. No evidence of petroleum products, hazardous substances, or other indications of contamination (i.e., odors, signs of staining, stressed vegetation, etc.) were observed in association with any of these features.

At the time of the Site inspection, a water feature was noted on the central portion of the Site. However, the water did not appear to be hydraulically connected to any streams or other water sources.

It should be noted that located throughout the Site are small areas of tires, demolition and landscaping debris, household waste items, appliances, metal scraps, empty metal 55-gallon drums, rubber sheeting, and glass. Some of these areas appear to be consistent with the Site's prior use for staging materials. However, the identified Dump Areas 1-5 appear to be localized dumping areas of a variety of the previously discussed items.

6.3.2 Interior Observations

At the time of the assessment, no structures were located on the property.

7.0 Interviews

7.1 Interview with Owner

Mr. Kent Fuller of Pargnotti Enterprises, Inc., landowner of Site, submitted the Interview Questionnaire and User Questionnaire on June 23, 2021. Copies of the completed forms are included in Appendix F. The Client did not return a completed User Questionnaire. Mr. Fuller informed **Kleinfelder** of the following:

- Mr. Fuller indicated that Allen Industries Scrapyard adjoins the property to the west and has a right-of-way easement since July 1974 to present day. A construction company has been using the property since 1990's. Railroads crossed the property and were used for mining operations. Mr. Fuller stated that Lehigh Valley Coal company use the Site for mining and No1 Contracting Corporation used for highway construction.

Mr. Fuller indicated that the Site had coal mining structures that included breaker and related buildings. Specifically, a boiler house, office, and shop from 1958 to 1990's. The Site formerly had slopes and shafts associated to mining operations. Mr. Fuller stated that the construction company has garages, trucking equipment, repair facilities, fuel, oil and etc.

- Mr. Fuller was aware that there are surface mine permits and possible mining related studies completed at the Site.
- Mr. Fuller indicate that ASTs, automotive batteries, industrial batteries, paints, chemicals/hazardous substances, industrial drums, and transformers probably were on the Site but not certain. Mr. Fuller was not aware if chemicals/hazardous substances, USTs, or unknown materials you suspect may be hazardous substances existed on the Site.
- Mr. Fuller indicated that there is a National Pollution Discharge Elimination System (NPDES) permit (GP-104) under the surface mining permit.
- Mr. Fuller stated that he is not aware of a private well or non-public water system, oil/gas wells, or onsite septic system on the Site.
- Mr. Fuller stated that he is not aware of any specific chemical storage, spills or chemical releases, or any environmental cleanups or concerns at the Site.
- Mr. Fuller stated that he is unaware of any environmental clean-ups that are ongoing or pending, environmental liens, past or present violations of environmental laws, or past, threatened, pending lawsuits relevant to a release of hazardous substance or petroleum product in, on, or from the Site.

8.0 Findings and Opinions

KLEINFELDER has performed the Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13. The assessment was performed for the Site referred to as “Haul Road & Johnson Street” located northwest of the intersection of Haul Road & Johnson Street in Wilkes Barre Township, Luzerne County, Pennsylvania. Any exceptions to or deletions from this practice are described in Sections 2.4, 2.5, 10.0, and 14.0 of this report.

Current and Past Usage of the Site:

- Historically, the Site was used as an anthracite coal mine named Lehigh Valley Coal Company Franklin Colliery, dating back to as early as 1910. Mining operations continued at the Site until approximately 1981. Since that time, no development has occurred at the Site. The Site is classified as abandoned mine land (AML) with a status of reclamation completed. Many areas are now wooded or vegetated, and one strip pit has filled with water. Coal mining has been known to be associated with AMD. Typically, discharge through anthracite coal formations are more pH neutral and often does not lead to AMD conditions. During Site reconnaissance, **KLEINFELDER** observed the conditions of a water feature on the Site; no evidence of AMD (i.e., yellowish to orange staining, cloudy water) was noted. Therefore, it is the opinion of **KLEINFELDER** that the historical use of the property does not represent a REC.
- During the Site reconnaissance, evidence of former railroad activity was observed within the northeastern and traversing the central portion of the Site. Remnants of the railroad tracks are evident through the Site based on the lack of vegetation, discarded railroad ties, metal rail lines protruding from the ground, and flat grade. According to historical Sanborn maps, eleven railroad lines were located on the property in 1910. Between 1910 and 1950, the tracks that exited the Site to the west no longer were noted, and five (5) sets of tracks remained. Rail lines no longer appear to be visible in the 1981 historical aerial images. Railroad tracks and associated equipment and staging areas are often associated with contamination from leaking of lubricants, PCBs, metals, and various petroleum products. Given that portions of the Site have at one time contained eleven sets of railroad tracks since 1910, with portions of the rail lines still currently at the Site, it is the opinion of **KLEINFELDER** that this finding **does** represent a REC.
- According to the 1910 Sanborn maps, the Lehigh Valley Coal Company Franklin Colliery contains a fireman’s office, engine house, a two-story oil house, a sawmill, a supply storage house, a pump house, a district support office, a courthouse, a pump house, several outbuildings, a breaker structure, rail lines, and a tool shop. The Site was listed as utilizing steam and electricity with fuel coal during operations. The 1969 Sanborn map identifies a grease house located southwest of the main office. Based on known tool shop and historic

operations at the Site that may have handled petroleum products, it is the opinion of **KLEINFELDER** that these findings **do** represent a REC.

- While onsite, five (5) dumping areas were observed and designated as Dump-1 through Dump-5. Dump-1 is located near the eastern property border of the Site and consists of construction debris primarily comprised of asphalt, concrete, and stone. Additionally, household trash consisting of plastic items and general garbage was in the area. Dump-2 is located on the north-central portion of the Site and consists of empty 55-gallon storage drums, household waste, and construction debris. A burn barrel was located just south of Dump-2 and appeared to contain mainly wood. Dump-3 is located just south of Dump-2 and contains tires, crushed empty 5-gallon buckets, construction signs, aluminum cans, tires, wooden boards, and rubber sheeting. Continuing further south on the property, Dump-4 is located within a heavily wooded area and consists of empty 5-gallon buckets, corrugated piping, household trash, tires, and metal scrap. The final area of dumping, Dump-5, keeps consistent with the other dump areas and is located along Allan Road. No evidence of petroleum products, hazardous substances, or other indications of contamination (i.e., odors, signs of staining, stressed vegetation, etc.) were observed in association with any of these features. Given that the possibility exists that hazardous substances or petroleum products may be present beneath the surface of the dumping areas, it is the opinion of **KLEINFELDER** that these findings **do** represent a REC.
- A paper target and bullet casings were observed on the ground on the eastern portion of the Site. Based on the likely presence of lead in underlying soils due to the use of the Site as a shooting range, it is the opinion of **KLEINFELDER** that this finding **does** represent a REC.
- Throughout the Site are small areas of tires, demolition and landscaping debris, household waste items, appliances, metal scraps, empty metal 55-gallon storage drums, rubber sheeting, and glass. Some of these areas appear to be consistent with the Site's prior use for staging materials. In addition, no staining or stressed vegetation was observed in these areas; therefore, **KLEINFELDER** believes that these findings do not represent a REC.
- The Site was listed on the eFACTS database under South Wilkes-Barre 656803 – AML Inventory List. According to the eMapPA database, the property is listed as an AML Inquiry under Pagnotti Enterprises Inc. for deep underground coal mining. The reclamation status is listed as complete. No other information is provided. Therefore, it is the opinion of **KLEINFELDER** that this finding does not represent a REC.

9.0 Conclusions

KLEINFELDER has performed the Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of the Site located northwest of the intersection Haul Road & Johnson Street in Wilkes Barre Township, Luzerne County, Pennsylvania. The findings and conclusions of this report are for the exclusive benefit and use of Bluecup Ventures, LLC, their respective affiliates and subsidiaries, and all successors and assigns thereof. Any exceptions to or deletions from this practice are described in Sections 2.4, 2.5, 10.0, and 14.0 of this report.

This assessment has revealed no evidence of RECs in connection with the property, except for the following:

- Railroad tracks that are historically and currently located on the Site.
- The likely presence of petroleum products or hazardous substances in Site soils associated with the Sanborn Fire Insurance Maps identified grease house.
- The five (5) areas of dumping on the Site.
- The likely presence of lead in Site soils associated with the shooting range.

10.0 Data Gaps, Deviations, and Limitations

A data gap is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice including but not limited to Site reconnaissance and interviews.

During the course of this assessment, one data gap was identified for this Phase I ESA:

- ASTM E 1527-13 states the historical use of a property should be identified at five-year intervals dating back to original development or 1940, whichever is earlier. Data gaps exceeding five-year intervals were encountered during our historical research on the Site. However, it is the opinion of **KLEINFELDER** that these data gaps are not significant with regard to identifying RECs.

No other significant data gaps were noted during the course of this Phase I Environmental Site Assessment.

KLEINFELDER performed this Phase I ESA in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*.

No deviations, limitations, or deletions from ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13* occurred or were imposed by the Client during the preparation of this Phase I ESA.

11.0 Additional Services/Non-Scope Considerations

This assessment did not include any additional services/non-scope considerations from ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13*.

13.0 Environmental Professional(s) Statements and Signature(s)

I have the specific qualifications based on education, training, and experience necessary to assess a property of the nature, history, and setting of the Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

I declare that to the best of my professional knowledge and belief that I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312.

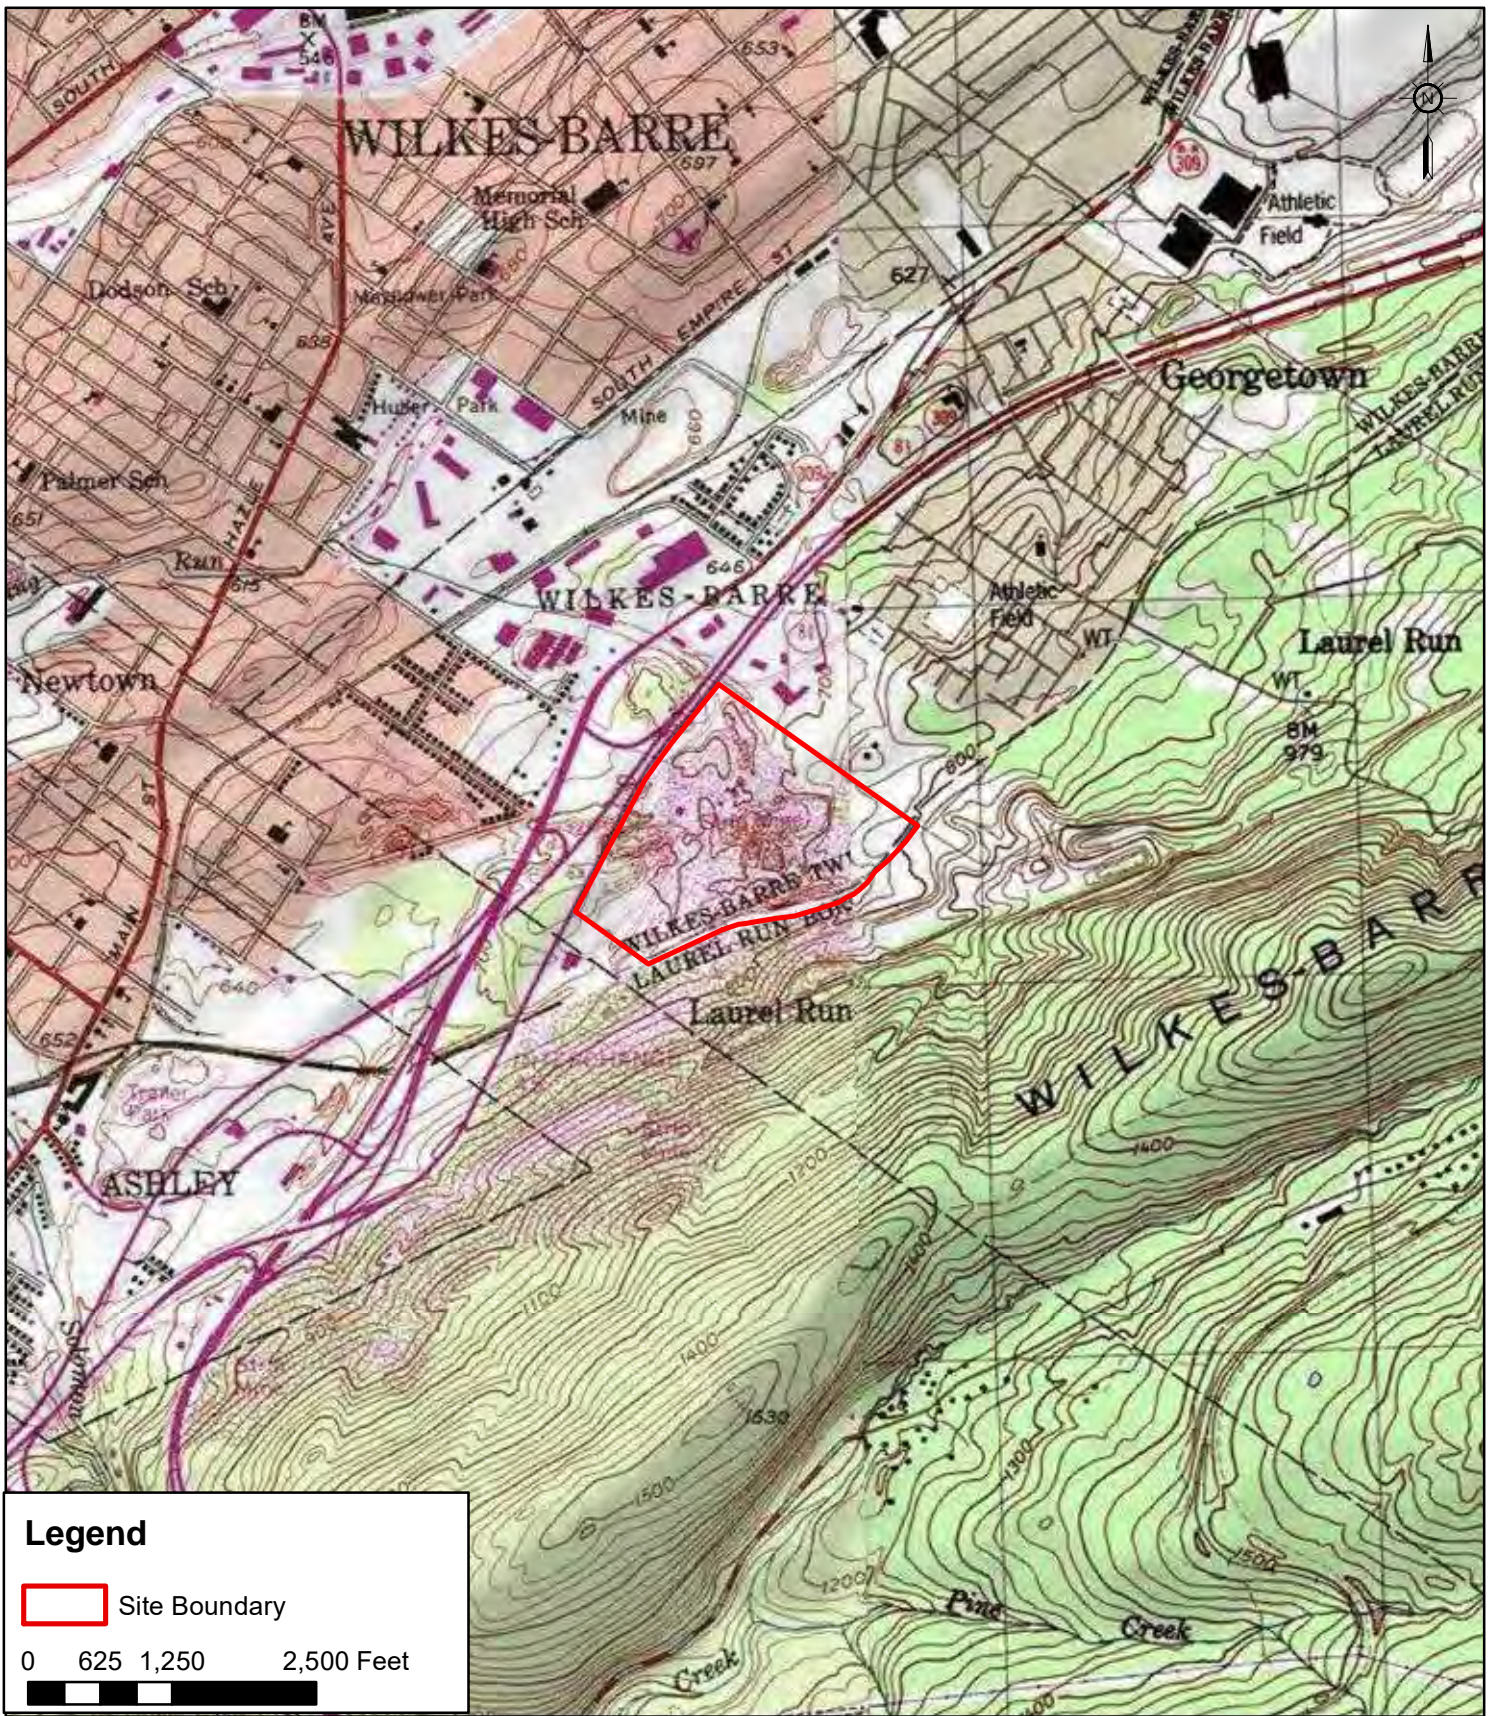

Mark C. Steele, CHMM
Senior Program Manager

14.0 General Limitations

The Environmental Assessment activities and the preparation of this Report were conducted in accordance with practices and procedures generally accepted in the consulting engineering field. The information contained in this Report is further qualified as follows:

1. **KLEINFELDER** assumes no responsibility for matters of a legal nature affecting the Site inspected or the title thereto.
2. Any sketch appearing in or attached to the inspection Report, or any statement of dimensions, capacities, quantities, or distances, are approximate and are included to assist the reader in visualizing the Site. **KLEINFELDER** made no survey of the Site.
3. Employees of **KLEINFELDER** are not required to give testimony or appear in court because of having made the inspection with reference to the Site in question, unless arrangements have been previously made, therefore.
4. This Report is not intended to have any direct effect on the value of the Site inspected but simply to provide a visual Environmental Assessment solely for the benefit of the Principal Parties.
5. Information, estimates, and opinions furnished to **KLEINFELDER** and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, **KLEINFELDER** has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items. No other warranty is given or implied by this Report.
6. The Report is solely for the benefit and personal use of the Principal Parties and is subject to and issued in connection with the Proposal and the Terms and Conditions attached thereto. The data reported and findings, observations, and conclusions expressed in the Report are limited by the Scope of Work.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CREST QUALITY CLEAN EPA ID.: PAD061328035	PENN PLAZA SHOPPING	NNE 1/8 - 1/4 (0.235 mi.)	29	83

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

PA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Resources' List of Confirmed Releases.

A review of the PA LUST list, as provided by EDR, and dated 12/01/2020 has revealed that there are 7 PA LUST sites within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ABANDONED MINES: An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

A review of the ABANDONED MINES list, as provided by EDR, and dated 12/11/2020 has revealed that there is 1 ABANDONED MINES site within approximately 0.25 miles of the target property.

Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U117
Waste Description: ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U211
Waste Description: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

Waste Code: U240
Waste Description: 2,4-D, SALTS & ESTERS (OR) ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS (OR) DICHLOROPHENOXYACETIC ACID 2,4-D

Waste Code: U279
Waste Description: U279

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A

Number of Days to Update: 26	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

	Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/07/2020	Source: Drug Enforcement Administration

PFAS: Sites With Known PFAS Contamination

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are man-made chemicals, are resistant to heat, water and oil, and persist in the environment and the human body. PFAS are not found naturally in the environment. They have been used to make cookware, carpets, clothing, fabrics for furniture, paper packaging for food, and other materials that are resistant to water, grease, or stains. They are also used in firefighting foams and in a number of industrial processes.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

	Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 10/20/2020	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Version Date: 2013

Southeast Map: 5947202 WILKES-BARRE EAST, PA
Version Date: 2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

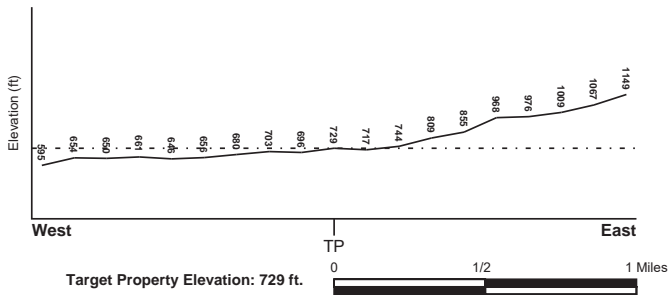

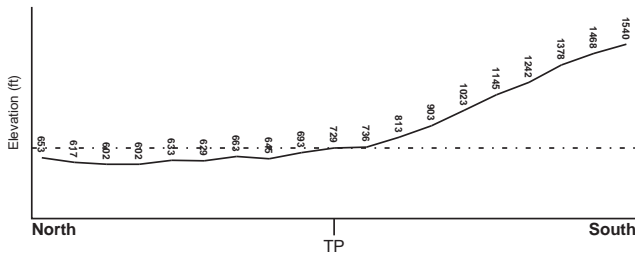

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
42079C0357E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
42079C0380E	FEMA FIRM Flood data
42079C0359E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
WILKES-BARRE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Strip mine

Soil Surface Texture: very channery sandy loam

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 102 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	very channery sandy loam	Not reported	Not reported	Max: 141.14 Min: 0.42	Max: 8.4 Min: 4.5
2	5 inches	59 inches	very channery silt loam	Not reported	Not reported	Max: 141.14 Min: 0.42	Max: 8.4 Min: 4.5

Soil Map ID: 2

Soil Component Name: Dekalb

Soil Surface Texture: channery sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 76 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

HYDROGEOLOGIC INFORMATION

AQUIFLOW[®] Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The sub facility ids you reference are for Abandoned Mine Land and any records would be held by BAMR(Bureau of Abandoned Mines).

We cannot search entire streets. You need to provide a street number with the street name.

If you could provide permit numbers, facility ids and/or site ids, that would be beneficial in searching records.

Below are two links to aid in your search. eFacts online and the Environmental Search Tool.

Right-To-Know Response Form

April 10, 2021

Chad Wolf

Via email only: cwolf@kleinfelder.com

RTK REQUEST: 2021-061

Mr. Wolf,

Thank you for writing to Luzerne County with your request for information pursuant to the Pennsylvania Right-To-Know law. We recently received from you a request for records as described in the attached Right To Know request. Your request is denied for the following reasons, as permitted by Section 705 of the Act.

Cited from the Right To Know Law Section 705:

Section 705. Creation of record.

When responding to a request for access, an agency shall not be required to create a record which does not currently exist or to compile, maintain, format or organize a record in a manner in which the agency does not currently compile, maintain, format or organize the record.

Luzerne County does not have a Health Department and does not maintain documentation with regards to environmental matters. We would direct you to the Pennsylvania Department of Environmental Protection, as well as, the code enforcement department for the local municipality (Wilkes-Barre Township) with regard to records related to the property subject to your request.

You have a right to appeal this denial of information in writing to Office of Open Records, Commonwealth Keystone Building, 400 North Street, 4th Floor, Harrisburg, PA 17120.

If you choose to file an appeal you must do so within 15 business days of the mailing date of the agency's response. Section 1101. If you have further questions, please contact the undersigned. Please be advised that this correspondence will serve to close this record with our office as permitted by law.

Respectfully,

Shannon Crake Lapsansky, Esq.
Interim Open Records Officer
Luzerne County
200 North River Street
Wilkes-Barre, PA 18711
(570)825-1598

Standard Right-to-Know Law Request Form

Good communication is vital in the RTKL process. Complete this form thoroughly and retain a copy; it is required should an appeal be necessary. You have 15 business days to appeal after a request is denied or deemed denied.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Kleinfelder were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Haul Road and Johnson Street Phase I ESA

Wilkes Barre, Luzerne County, PA

Project No: 20214488.001

25. View of Dump-3 on the central portion of the Site.

26. View of concrete caissons on the central portion of the property.

27. View of central portion of the Site.

28. View of area of dumping on the southern portion of the Site. (Dump-4)

29. View of dumping along the western hillside of the Site. (Dump-5)

30. View of the northern portion of the Site.

APPENDIX F

Phase I Questionnaire

INTERVIEW QUESTIONNAIRE
PHASE I ENVIRONMENTAL SITE ASSESSMENT
Compatible with ASTM Standard E 1527-13

Prepared by Kleinfelder Environmental Site Characterization Practice Group

Site Name: Franklin Property
Site Address: 350 Johnson Street Wilkes-Barre PA 18702
1001 Wilkes-Barre Twp Blvd. Wilkes-Barre PA 18702
Date: 6-23-2021
Interviewer: Pagnotti Enterprises, Inc.
Interviewee: Kent Fuller
Site Association: Landowner
Years Associated: 1963 to present Dd BK 1531 Pg. 238

Please answer the following questions to the best of your knowledge.

1. Was the property or adjoining property ever used for industrial purposes (e.g. manufacturing) or as a gas station, dry cleaners, waste treatment, processing facility, motor repair facility, photo lab, commercial printing facility, junkyard/disposal/recycling/ landfill? If yes, please list the activity, hazardous substances used, and approximate dates when the activity occurred.

Prior land use, hazardous substances used, and dates:

- Adjoining to west - Allan Industries Scrap Yard
(right of way easement - July 1974) to present
- Construction Company on property 1990's
- Railroads crossed the property & used for mining operations

Prior owners, key site managers/operators, occupants and dates:

- Lehigh Valley Coal Company - mining
- No. 1 Contracting Corporation - highway construction

Existing or prior structures used for what purposes and duration:

- Coal Mining - Breaker - related buildings
- Boiler house, office, shop, Razed 1958 - 1990's
slopes & shafts
- Construction Company - Garages, Trucking
equipment, repair, fuel, oils, etc.

2. Do any of the following documents exist for the site or any portion of the site? If so, can you provide Kleinfelder with a copy? (This question to be asked before site visit).

- Environmental site assessment reports
- Environmental compliance audit reports
- Environmental permits *Surface Mine Permits*
- Underground Storage Tank registration
- Underground Injection System registration
- Material Safety Data Sheets
- Community Right-To-Know Plan
- Safety plans: preparedness and prevention plans; spill prevention; countermeasure; and control plans, etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area;
- Correspondence from any government agency relating to past or current violations of environmental laws with regard to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies *Possible Mining Related Study*
- Risk assessments
- Recorded Activity and Use Limitations (AULs)

3. Have you ever observed evidence of or do you have prior knowledge of any of the following items being used, stored, discarded, dumped above grade, buried, or burned onsite? Circle all that apply and indicate amount and approximate dates.

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Above ground storage tank (AST)*	<i>Probably, but not certain</i>		Size: Contents: Condition:
Automotive batteries	<i>Probably, but not certain</i>		
Industrial batteries	<i>Probably but not certain</i>		
Pesticides (>5 gallon)	<i>—</i>		
Paints (> 5 gallon)	<i>probably but not certain</i>		
Chemicals/Hazardous Substances (> 5 gallon liquid)	<i>probably but not certain</i>		

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Chemicals/Hazardous Substances (dry sacks, containers, etc.)	do not know		
Industrial drums (typically 55 gallons)	probably but not certain		Contents: Condition:
Transformer or other equipment that may contain PCBs (e.g. hydraulic equipment)*	probably but not certain		Installation date:
Underground storage tank*	do not know		Size: Contents: Condition:
Unknown materials you suspect may be hazardous substances	do not know		Describe:

*Please provide records if available.

4. What method(s) is used to contain spills of hazardous waste?

5. What method(s) is used to dispose of hazardous waste?

6. Are there any permits for handling, use, storage, or disposal of hazardous waste?

standard DEP regs. + NPDES (GP-104) under the
Surface Mine Permit

7. Have you observed evidence of or have prior knowledge of the following onsite?

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Equipment Maintenance Areas	Probably		based on what business was.
Accidental spills or releases of chemicals or petroleum products	do not know		

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Possible asbestos containing materials (e.g. pipe, building, etc.)	Do not know		Describe material:
Fill dirt originating from an unknown or contaminated site?	Do not know		Source:
Pits, ponds, or lagoons associated with waste treatment or waste disposal?	Do not know		Location:
Stained soil or odiferous soil? (e.g. oily black)	Do not know		Location:
Sumps or dry wells*	Probably - Do not know		Size : Contents : Condition :
Vent pipes, fill pipes, access ways to a fill pipe protruding from the ground or adjacent to a structure onsite?	Do not know		Location:
Heating and cooling systems (include fuel source)	Do not know		Source:
Flooring, drains, walls that are stained or emitting a foul odor (do NOT include water damage)?	Do not know		Location:

*Please provide records if available.

8. Is the property served by a private well or non-public water system? If so, please answer the following:

Do not think so.

a. Was the well used for domestic (D), agricultural irrigation (I), or monitoring (M) purposes? Are the wells currently operational and if not, when were they last used? When was the well drilled? How deep is the well? What is the approximate discharge rate?

Well No.	Type	Operating?	Last Used	Date Drilled	Depth	Discharge Rate	Location
1-							
2-							

b. Have the wells been sampled for contaminants that exceed applicable requirements for the designated use (e.g. Drinking Water Standards)? If so, please provide the dates and copies of well records.

c. Has the well or water system been designated by any governmental environmental/health agency as contaminated?

9. Is there an oil/gas well or oil/gas vent located onsite? If so, please indicate the location. Please supply any documents available.

Do not think so.

10. Is the property or has the property to your knowledge been previously served by a septic system? If so, please indicate the location of the tank and leach lines (if applicable) and list any hazardous materials disposed.

Do not know.

11. Does the property discharge waste water into a storm water sewer system or a sanitary sewer system onto or adjacent to the property? If so, please describe location, piping flow, quantity discharged, and water quality.

Do not know.

12. Do you have knowledge of the following with respect to the property? Circle and explain all that apply. *None that I know of*

- a. Environmental clean-up, ongoing or pending.
- b. Environmental liens
- c. Governmental notifications regarding any possible past or present violations of environmental laws.
- d. Past, threatened, pending lawsuits or administrative proceedings relevant to a release of a hazardous substance or petroleum product, in, on, or from the property.

- e. Prior environmental assessment that indicated the presence of hazardous substances, petroleum hydrocarbons, contaminants, or recommended further assessment.
- f. Deed Restrictions
- g. Citizen complaints regarding activities onsite

AGRICULTURAL SITES:

13. What crops have been grown onsite, currently and in the past? *None known.*

CROP	DATE	LOCATION

If crops are present or have been grown, please answer questions 14 through 16 below:

14. Have pesticides been applied to fields or other portions of the site? If so, please answer the following questions:

- a. List the names of pesticides (includes herbicides, fungicides, insecticides, rodenticide) used and dates applied.

PESTICIDE AND BRAND NAME	DATE	CROP OR ANIMAL USE

b. Have you been notified of any violation of environmental law with respect to application or storage of pesticides?

c. Location of pesticide mixing areas, if any (past or present)?

d. Method of pesticide application?

15. Have fertilizers been applied to the site? What type and method of application?

16. Are there any buried pipelines for irrigation or other purposes onsite? If so, what materials is the piping constructed of? Asbestos containing material, PVC, other? Describe the location of buried piping.

there is a water line that crosses the property

INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)*¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*")², the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

(1.) Environmental liens that are filed or recorded against the *property* (40 CFR 312.25).

Did a search of *recorded land title records* (or judicial records where appropriate, see *Note 1* below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

no liens that are known

Note 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2.) Activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and vi)).

Did a search of *recorded land title records* (or judicial records where appropriate, see *Note 1* above) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

Possibly only the Reclamation Requirements under the DEP surface mining permit.

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

We are in a related business, mining coal & refuse material

¹ *Landowner Liability Protections*, or *LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("Common Elements" Guide) issued on March 6, 2003.

² P.L. 107-118.

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Unknown

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases?

For example,

- (a.) Do you know the past uses of the *property*? Coal mining, construction related, heavy equipment
- (b.) Do you know of specific chemicals that are present or once were present at the *property*? Possibly those chemicals or materials commonly used in historical mining.
- (c.) Do you know of spills or other chemical releases that have taken place at the *property*? Nothing specific known.
- (d.) Do you know of any environmental cleanups that have taken place at the *property*? No specific cleanups are known.

(6.) The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*?

Nothing outside of the known businesses that were at the property.

ASTM E1527-13
Phase I Environmental Site Assessment
User Questionnaire

In addition, certain information should be collected, if available, and provided to the *environmental professional* conducting the *Phase I Environmental Site Assessment*. This information is intended to assist the *environmental professional*, but is not necessarily required to qualify for one of the *LLPs*. The information includes:

- (a) the reason why the Phase I is being performed,
- (b) the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,
- (c) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful),
- (d) the scope of services desired for the Phase I ESA (including whether any parties to the *property* transaction may have a required standard scope of services or whether any considerations beyond the requirements of Practice E1527 are to be considered),
- (e) identification of all parties who will rely on the Phase I *report*,
- (f) identification of the site contact and how the contact can be reached,
- (g) any special terms and conditions which must be agreed upon by the *environmental professional*, and
- (h) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

Mark C. Steele

Senior Program Manager

Mr. Steele is an environmental professional as defined by the United States Environmental Protection Agency (US EPA) All Appropriate Inquiries (AAI) final rule. He specializes in Phase I Environmental Site Assessments (ESAs) and Phase II Subsurface Investigations for a wide variety of commercial, industrial, agricultural, and residential properties for various private clients, financial institutions, land developers, environmental law firms, and local governments. Mr. Steele has performed, supervised, and renewed over 1,000 Phase I ESAs for nationally acclaimed clients.

Selected Project Examples

Boise Cascade, LLC, Due Diligence Services, National

Mr. Steele has been the point of contact for the Building Materials Distribution division for due diligence services working directly with the Corporate Environmental Manager. Using resources across Kleinfelder we have successfully completed Phase I ESAs for acquisition, divestment, lease renewal, and refinance projects in Arizona, Idaho, Louisiana, Maryland, New Hampshire, New Jersey, Utah, and Texas. Kleinfelder has provided additional services for these projects including Phase II ESAs, asbestos surveys, permit and regulatory compliance reviews, stormwater pollution prevention plans, and SPCC plans.

Confidential Client, Due Diligence and Environmental Management, Mid-Atlantic

Since 2012, Mr. Steele has provided environmental support services to the acquisition of 30 service station properties in the Mid-Atlantic. He supervised and provide technical review to

Phase I ESA for each location completed within a four-week turnaround. Mr. Steele led the team that completed expedited Phase II ESAs across three states to investigate recognized environmental concerns such as past historical uses, service bays, hydraulic lifts, ASTs / USTs, and adjacent properties of environmental concern. Reportable soil and or groundwater impacts were identified at each location and Mr. Steele working with the client was the point of contact with the state regulatory agencies obtaining no further action letters for 12 projects in Maryland with no additional field work beyond the Phase II ESA. Kleinfelder is the managing consultant for 13 open environmental cases within the District of Columbia and Virginia and activities include additional site assessment, groundwater monitoring, and free product removal, feasibility testing, reporting and regulatory negotiation.

Due Diligence Services, Sunoco LP, Maryland, New York, Texas and Virginia - Senior program manager for the completion of environmental services in support of a \$3.3 billion real estate transaction. Responsible for quality and client satisfaction for completion of 450 ASTM-compliant Phase I Environmental Site Assessments within an 11-weeks and 128 Phase II ESAs including over 650 borings in 6 months. Obtained NFA on 110 of 128 Phase IIs reducing client's long-term environmental liability. Coordinated over 120 Kleinfelder employees from 25 different offices to complete time-sensitive project.

Confidential Client, Due Diligence Services, Washington DC - Project Manager for the Phase I ESA, hazardous materials survey, and an expedited Phase II ESA for the \$13.48 million acquisition of a 44,000 square foot mixed-use community center. Reviewed regulatory agency records, historical land use, aerial photographs, interviews, and prepared the report. Based on identified Recognized Environmental

Concerns, developed the sampling and analysis plan, obtained DCRA permits, and executed a comprehensive multi-media Phase II ESA that included sub slab soil vapor sampling and interior and exterior soil borings for the assessment of chlorinated volatile organic compounds.

Phase I ESAs for Sale-Leaseback Retail Portfolio, Maryland - Project manager and lead technical reviewer for the completion of 43 Phase I ESAs to both Mesriow Financial and Angelo, Gordon & Company for a retail portfolio in central Maryland. The Phase I ESAs were completed on an expedited 3-week schedule from contract execution to final delivery. Mr. Steele served as the primary point of contact for the clients on both sides of the deal and provided regulatory guidance to the clients and counsel on identified recognized environmental conditions and liabilities associated with open environmental issues with the Maryland Department of the Environment.

Phase I & II ESA, Former Appliance Park East, Howard County, MD - Principal scientist for the Phase I & II ESA for this 48-acre distribution facility located within boundary of a RCRA facility from former industrial use. Responsibilities included historical data compilation, quality, and technical review of deliverables, developing indoor and outdoor air sampling plans and procedures, and coordination of field staff.

Confidential ASTM E1903 Phase II ESA, Eastern MD – Project manager responsible for work plan development, Quality Assurance Project Plan, and execution for this comprehensive ASTM E1903 Phase II ESA of a 20-acre facility that formerly maintained gas holders from a manufactured gas plant (MGP). The Phase II ESA was conducted to evaluate soil, groundwater, surface water, and sub-slab soil vapor as they relate to historic and current site operations which was accomplished through use of surface geophysics, soil borings, piezometers, and monitoring wells, aquifer testing, and extensive laboratory analysis.

Chlorinated VOC Investigation, Pointer Ridge Plaza Shopping Center, Bowie, MD Project Manager for a shopping center which Kleinfelder was retained by the client to address over 7 pages of Maryland Department of Environment (MDE) Voluntary Cleanup Program (VCP) comments to a VCP Application and Response Action Plan (RAP) submitted by another consultant for a 7 acre shopping center in Bowie, Maryland. The client was an inculpable person and was seeking to refinance the recently purchased property. The soil, groundwater, and soil vapor of the property was impacted with chlorinated volatile organic compounds (VOCs) from an on-site dry cleaner. Residences were located adjacent to the shopping center and deep potable wells were identified downgradient of the property. In order to respond to the MDE comments on the RAP and fill data gaps, Kleinfelder completed records reviews, utility surveys and camera inspections of drains and sewers, soil borings using the Membrane Interface Probe System (MIPS) with confirmatory soil and groundwater sampling and subsequent monitoring well installations to horizontally and vertically delineate impacted soil and groundwater, completed gamma logging of existing wells on the property, aquifer testing to define shallow and deep aquifer characteristics, and soil vapor extraction (SVE) pilot testing. Mr. Steele represented the client at a public meeting with the MDE VCP attended by more than 15 concerned citizens. Remediation cost estimates were developed for installation of a sub-slab depressurization system and for the remediation of groundwater to drinking water standards at the property lines as required by the MDE.

Phase II ESA and Voluntary Cleanup Program, Shopping Center, District Heights, MD - Project Manager responsible for additional site characterization activities required by the MDE VCP in support of an outstanding VCP Application submitted by another consultant for a 22 acre shopping center in District Heights, Maryland. The client was an inculpable person and was seeking to refinance the property to fund modifications. The property was assessed against residential standards (Tier II B land use) due to the presence of an on-site day care facility. Recognized environmental concerns identified included two dry cleaners and a former auto repair facility with hydraulic lifts. Kleinfelder activities included work plan preparation, water well survey, utility surveys and site plan development, soil borings to collect updated soil and groundwater data for metals, VOCs, PAHs, and PCBs, and sub slab soil vapor sampling for VOCs. The results of the investigation were compiled and submitted to the MDE VCP. The report and updated VCP application was accepted by the MDE without comment.

Due Diligence and Voluntary Cleanup Program, Industrial Property, Annapolis Junction, MD - Principal-In-Charge responsible for environmental services for a 6-acre industrial property as part of a \$102-million transit-oriented development. Services included Phase I and II ESA, remedial alternatives analysis, RAP and RAP implementation resulting in a Certificate of Completion from the MDE VCP. Responsible for Phase I ESAs and multi-media Phase II ESAs of two subdivided parcels and obtained two No Further Requirements Determination for restricted residential (Tier 1B) use.

Vapor Intrusion and Mitigation, State of Delaware, Claymont, DE - As Program Manager for Kleinfelder's Hydrogeologic Investigation contract with the State of Delaware, Mr. Steele was responsible for the design and implementation of a vapor intrusion investigation and mitigation in Claymont, DE. The investigation was initiated by the State of Delaware downgradient of an active LUST project in a residential neighborhood with documented vapor complaints and failed mitigation attempts since 1988. Mr. Steele oversaw the development of the Conceptual Site Model (CSM) for both residential and commercial exposure scenarios and developed the investigation program that included soil vapor, sub-slab, indoor air, and sump sampling as conditions warranted in the Hillside Road neighborhood. The vapor intrusion study data was used to complete a human health risk assessment and mitigation plan for two residences with benzene in indoor air above DNREC risk thresholds. The mitigation approach designed and constructed for the residences included installation of French drain system with sub slab depressurization and sand blasting and seal coating the basement floors and walls. Mr. Steele presented the results of the VI study, risk assessment and mitigation plans in two public meetings and an EPA Region 3 LUST Technical Conference with the client.
